Subject Index for Volume 9

- β -scission growth mechanism**
Theoretical study of chemical reactions on CVD diamond surfaces, 241
- n*-type diamond**
Electronic states of phosphorus in diamond, 948
- Absorption**
Measurement and mapping of very low optical absorption of CVD diamond IR windows, 1021
- Acetylene**
Diamond-like carbon prepared by high density plasma, 638
Amorphous hydrogenated carbon films as barrier for gas permeation through polymer films, 1971
- Activation energies**
On the annihilation of vacancies by diffusing interstitial atoms in diamond, 1835
- Adhesion**
High reduction of diamond friction by oxygen containing liquids, 185
Chemical vapour deposition of diamond on nitrided chromium using an oxyacetylene flame, 341
Influence of SiC particle addition on the nucleation density and adhesion strength of MPCVD diamond coatings on Si₃N₄ substrates, 483
Substrate surface temperature as a decisive parameter for diamond-like carbon film adhesion to polyethylene substrates, 711
The mechanism of destruction of a-C:H films under the action of aggressive liquids, 843
Formation of cubic boron nitride thin films using ECR plasma enhanced CVD, 1336
Preparation and performance of diamond coatings on cemented carbide inserts with cobalt boride interlayers, 1738
Pre-treatment for diamond coatings on free-shape WC–Co tools, 1743
- Adhesion strength**
Diamond coatings deposited on tool materials with a 915 MHz scaled up surface-wave-sustained plasma, 1120
- Adhesive c-BN films**
Growth of adhesive c-BN films on a tensile BN buffer layer, 592
- Adsorbents**
Diamond — an adsorbent of a new type, 2002
- Adsorption**
Adsorbed states of K on the diamond (100)(2 × 1) surface, 162
Roles of nitrogen and boron hydride adsorptions on silicon (001) substrate in boron nitride growth, 596
- Aggregation**
Mechanisms of nitrogen aggregation in nickel- and cobalt-containing synthetic diamonds, 883
- Al–Si alloy**
The cutting performance of diamond and DLC-coated cutting tools, 1747
- AlN**
Epitaxial aluminum nitride thin films grown by pulsed laser deposition in various nitrogen ambients, 516
- Alpha particle**
Corrosion hard CVD diamond alpha particle detectors for nuclear liquid source monitoring, 1003
- Aluminium**
Microstructural analysis of III–V nitrides grown on 6H–SiC by metal–organic vapour phase epitaxy (MOVPE), 452
- Aluminum bronze**
The cutting performance of diamond and DLC-coated cutting tools, 1747
- Aluminum nitride films**
Nucleation and growth of diamond films on aluminum nitride by hot filament chemical vapor deposition, 1660
- Ammonia**
Intrinsic stress evolution in diamond films prepared in a CH₄–H₂–NH₃ hot filament chemical vapor deposition system, 1388
- Amorphous carbon**
Optical characterization of amorphous hydrogenated carbon films, 48
Transmission electron microscopy study of diamond nucleation and growth on smooth silicon surfaces coated with a thin amorphous carbon film, 274
Bonding regimes of nitrogen in amorphous carbon, 643
Studies of carbon ion self-implantation into hydrogenated amorphous carbon films, 675
Comparative study of anneal-induced modifications of amorphous carbon films deposited by dc magnetron sputtering at different argon plasma pressures, 680
Crystalline structures of carbon complexes in amorphous carbon films, 703
Asymmetry of ‘valence’ and ‘conduction’ Gaussian π bands in a-C:H and a-C thin films and its origin, 732
Comprehensive study on the properties of multilayered amorphous carbon films, 756
Semiconducting hydrogenated carbon–nitrogen alloys with low defect densities, 777
On the structure of argon assisted amorphous carbon films, 796
A carbon based bottom gate thin film transistor, 805
Diamond-like carbon coatings applied to hard disks, 815
Comparative studies on field emission properties of carbon-based

- materials, 1249
- Effects of short-range order on the electronic structure and optical properties of amorphous carbon, 1369
- Micro-Raman analysis of the cross-section of a diamond film prepared by hot-filament chemical vapor deposition, 1712
- Amorphous carbon films
 - Amorphous carbon: how much of free hydrogen? 707
 - Optical properties and new vibrational modes in carbon films, 741
- Amorphous hydrogenated carbon
 - An optical absorption and electron spin resonance study in hydrogenated amorphous carbon prepared by radio frequency sputtering, 728
 - Asymmetry of 'valence' and 'conduction' Gaussian π bands in a-C:H and a-C thin films and its origin, 732
 - On the microstructural, optical and mechanical properties of hydrogenated amorphous carbon films deposited in electron cyclotron resonance plasma, 752
 - Photoluminescence and infra-red absorption of hydrogenated amorphous CN_x films, 761
 - Structural modification of polymeric amorphous hydrogenated carbon films induced by high energetic He^+ irradiation and thermal annealing, 1752
 - Amorphous hydrogenated carbon films as barrier for gas permeation through polymer films, 1971
- Amplification
 - Highly efficient electron emitting diode fabricated with single-crystalline diamond, 1561
- Anisotropy
 - Investigation of electromechanical distortions in gallium nitride by reflectance anisotropy spectroscopy, 460
 - Diamond polishing from different angles, 925
- Annealed undoped diamond
 - The annealing effect on the electrical property of the Al/undoped diamond film, 73
- Annealing
 - Stability of carbon nitride films prepared from volatile CN species via atomic transport reactions, 539
 - Comparative study of anneal-induced modifications of amorphous carbon films deposited by dc magnetron sputtering at different argon plasma pressures, 680
 - Amorphous carbon: how much of free hydrogen? 707
 - Semiconducting hydrogenated carbon-nitrogen alloys with low defect densities, 777
 - The growth rate effect on the nitrogen aggregation in HTHP grown synthetic diamonds, 893
 - Tailoring of the field emission properties of hydrogenated amorphous carbon thin films by nitrogen incorporation and thermal annealing, 1205
 - The change of Fe-Ni alloy inclusions in synthetic diamond crystals due to annealing, 1374
 - Electron emission from diamond thin films deposited by microwave plasma-chemical vapor deposition method, 1604
 - Structural modification of polymeric amorphous hydrogenated carbon films induced by high energetic He^+ irradiation and thermal annealing, 1752
 - Study of stress and infra-red absorption line of BN films containing various fractions of cubic phase, 1867
 - Effect of annealing on electron field emission properties of hydrogen-free amorphous carbon films, 1876
- Antimony
 - Material and n-p junction characteristics of As- and Sb-implanted SiC, 1887
- Application
 - A near-infrared diamond anti-reflective filter window, 1724
- Applications
 - Chemical vapour deposition diamond coated microtools for grinding, milling and drilling, 921
- Argon-hydrocarbon gas mixtures
 - Comparison of a-C:H films deposited from methane-argon and acetylene-argon mixtures by electron cyclotron resonance-chemical vapor deposition discharges, 37
- Arsenic
 - Material and n-p junction characteristics of As- and Sb-implanted SiC, 1887
- Artificial roughness
 - Ion polishing of a diamond (100) surface artificially roughened on the nanoscale, 1159
- Atomic force microscopy
 - The effect of nitrogen on competitive growth mechanisms of diamond thin films, 236
 - Boron carbide films deposited by a magnetron sputter-ion plating process: film composition and tribological properties, 489
 - Friction force microscopy study of diamond films modified by a glow discharge treatment, 1421
- Atomic hydrogen
 - A chemical adsorption growth model for hot filament chemical vapor deposition diamond, 1668
- Atomic transport reactions
 - Stability of carbon nitride films prepared from volatile CN species via atomic transport reactions, 539
- Auger electron spectroscopy
 - Understanding the chemistry of low temperature diamond growth: an investigation into the interaction of chlorine and atomic hydrogen at CVD diamond surfaces, 246
 - Semi-quantitative description of C hybridization via s- and p-partial density of states probing: an electron spectroscopy study, 1856
- Azaadenine precursor
 - Comparative study on the bonding structure of hydrogenated and hydrogen free carbon nitride films with high N content, 577
- BCN
 - The control of B-N and B-C bonds in BCN films synthesized using pulsed laser deposition, 620
- BN phases
 - Formation and structure of Ag, Ge and SiC nanoparticles encapsulated in boron nitride and carbon nanocapsules, 911
 - Features of a cBN-to-graphite-like BN phase transformation under pressure, 1487
- Band gap
 - Photoelectron emission characteristics of diamond near the band gap, 1036
- Band-edge emission
 - Highly efficient electron emitting diode fabricated with single-crystalline diamond, 1561
 - Growth and characterization of hillock-free high quality homoepitaxial diamond films, 1650
- Beam monitoring
 - Diamond as a tool for synchrotron radiation monitoring: beam position, profile, and temporal distribution, 960

Bias

- Deposition of heteroepitaxial diamond on 6H-SiC single crystal by bias-enhanced microwave plasma chemical vapor deposition, 283
- Biased enhanced growth of nanocrystalline diamond films by microwave plasma chemical vapor deposition, 1331

Bias enhanced nucleation

- Characterisation of the secondary glow region of a biased microwave plasma by optical emission spectroscopy, 305

Bias-enhanced nucleation

- Parametric study of bias-enhanced nucleation of diamond on platinum in microwave plasma, 251
- Ion energy distributions and their evolution during bias-enhanced nucleation of chemical vapor deposition of diamond, 317
- Friction force microscopy study of diamond films modified by a glow discharge treatment, 1421

Biases-assisted hot filament chemical vapor deposition

- Heteroepitaxial nucleation of diamond on Si(100) via double bias-assisted hot filament chemical vapor deposition, 134

Biomaterial

- Carbon nitride films on orthopedic substrates, 1984

Bonding

- Deposition of carbon nitride films using an electron cyclotron wave resonance plasma source, 524
- Bonding regimes of nitrogen in amorphous carbon, 643
- Elastic constants of ultrathin diamond-like carbon films, 825
- Chemical bonding, structure, and hardness of carbon nitride thin films, 1784

Boron

- Characterisation by thermoluminescence of boron doped polycrystalline diamond films, 56
- Surface morphology and electrical properties of boron-doped diamond films synthesized by microwave-assisted chemical vapor deposition using trimethylboron on diamond (100) substrate, 1362
- Micro-Raman scattering and photoluminescence study of boron-doped diamond films, 1708

Boron carbon nitride film

- Field emission characteristics of boron carbon nitride films synthesized by plasma-assisted chemical vapor deposition, 1233

Boron doping

- Characteristics of homoepitaxial heavily boron-doped diamond films from their Raman spectra, 295
- Recent advances in electrochemistry of diamond, 384
- Low-compensated boron-doped homoepitaxial diamond films, 956
- Impedance studies of boron-doped CVD diamond electrodes, 1181

Boron nitride

- Characterization of boron nitride film synthesized by helicon wave plasma-assisted chemical vapor deposition, 67
- Fabrication and magnetic properties of boron nitride nanocapsules encaging iron oxide nanoparticles, 476
- Roles of nitrogen and boron hydride adsorptions on silicon (001) substrate in boron nitride growth, 596
- Electron-beam-induced currents on beryllium-doped cubic boron nitride single crystal, 605
- RF plasma selective etching of boron nitride films, 609
- Atomic structure and electronic state of boron nitride fullerenes and nanotubes, 625
- The different characteristics of boron and nitrogen atoms/ions on silicon(001) substrate and their effect on boron nitride growth, 1768

- Brillouin light scattering from surface phonons in hexagonal and cubic boron nitride films, 1957

Boron nitride films

- Study of stress and infra-red absorption line of BN films containing various fractions of cubic phase, 1867

Boron-deuterium complexes

- Capacitance-voltage profiling of deuterium passivation and diffusion in diamond Schottky diodes, 413

Boron-doped

- Properties of electron field emitters prepared by selected area deposition of CVD diamond carbon films, 1263

Boron-doped diamond

- Holes in boron-doped diamond: comparison between experiment and an improved model, 1076

Boron-doped diamond polycrystalline films

- Effect of boron concentration on the electrochemical reduction of nitrates on polycrystalline diamond electrodes, 1175

Boron-doped homoepitaxial diamond films

- Deep-level transient spectroscopy in the depletion zone of boron-doped homoepitaxial diamond films, 1041

Brightness

- Field emission from carbon nanotubes for displays, 1184

Brillouin light scattering

- Brillouin light scattering from surface phonons in hexagonal and cubic boron nitride films, 1957

Brillouin scattering

- Elastic constants of ultrathin diamond-like carbon films, 825

Buffer layer

- Growth of adhesive c-BN films on a tensile BN buffer layer, 592

Bulk crystal

- Evolution of thermoelastic strain and dislocation density during sublimation growth of silicon carbide, 446

Bulk diamond

- A study of plastic deformation profiles of impressions in diamond, 1115

Bulk diamond crystallites

- The annealing effect on the electrical property of the Al/undoped diamond film, 73

Butylamination

- Surface modification of hydrogenated diamond powder by radical reactions in chloroform solutions, 219

c-BN

- Microstructural characterization of diamond films deposited on c-BN crystals, 269

C-N bonds

- X-Ray photoelectron spectroscopy reference data for identification of the C_3N_4 phase in carbon-nitrogen films, 1904

C-O-H supercritical fluid

- Formation process of diamond from supercritical H_2O-CO_2 fluid under high pressure and high temperature conditions, 1945

C-H

- Thermodynamic limits for the substrate temperature in the CVD diamond process, 205

- C—H—O
Thermodynamic limits for the substrate temperature in the CVD diamond process, 205
- C₃N₄
Microstructure analysis of CN-based nanocage materials by high-resolution electron microscopy, 906
X-Ray photoelectron spectroscopy reference data for identification of the C₃N₄ phase in carbon-nitrogen films, 1904
- CITS
Characterization of boron doped polycrystalline CVD diamond by ultra high vacuum scanning tunneling microscopy, 1096
- CN_x films
Carbon nitride films deposited from organic solutions by electrodeposition, 1780
- CN_x
Study of the thermal stability of carbon nitride thin films prepared by reactive magnetron sputtering, 212
- CN_x:H films
Comparative study on the bonding structure of hydrogenated and hydrogen free carbon nitride films with high N content, 577
- CN_x
Carbon nitride films on orthopedic substrates, 1984
- CO₂
Optical emission spectroscopic studies of microwave enhanced diamond CVD using CH₄/CO₂ plasmas, 311
- CVD
The effect of d.c. glow discharge on hot filament chemical vapor deposition of diamond, 82
Thermodynamic limits for the substrate temperature in the CVD diamond process, 205
Electron density in moderate pressure diamond deposition discharges, 322
Modeling of gas phase nucleation during silicon carbide chemical vapor deposition, 472
Characterization of the broad green band luminescence in CVD and synthetic Ib diamond, 1017
Impedance studies of boron-doped CVD diamond electrodes, 1181
Thermally stimulated properties of CVD diamond films, 1245
Interfacial oxide and carbide phases in the deposition of diamond films on beryllium metal, 1327
Biased enhanced growth of nanocrystalline diamond films by microwave plasma chemical vapor deposition, 1331
Heteroepitaxial growth of diamond on an iridium (100) substrate using microwave plasma-assisted chemical vapor deposition, 1380
Enhanced nucleation of diamond on polycrystalline Ni by d.c. glow discharge in hot filament CVD, 1475
A near-infrared diamond anti-reflective filter window, 1724
- CVD diamond
Characterisation by thermoluminescence of boron doped polycrystalline diamond films, 56
Understanding the chemistry of low temperature diamond growth: an investigation into the interaction of chlorine and atomic hydrogen at CVD diamond surfaces, 246
Characterisation of the secondary glow region of a biased microwave plasma by optical emission spectroscopy, 305
Ion energy distributions and their evolution during bias-enhanced nucleation of chemical vapor deposition of diamond, 317
Free-standing diamond wafers deposited by multi-cathode, direct-current, plasma-assisted chemical vapor deposition, 364
Electrochemically induced surface modifications of boron-doped diamond electrodes: an X-ray photoelectron spectroscopy study, 390
Persistent photocurrents in CVD diamond, 404
Diamond as a tool for synchrotron radiation monitoring: beam position, profile, and temporal distribution, 960
Fast stable visible-blind and highly sensitive CVD diamond UV photodetectors for laboratory and space applications, 987
Performance of CVD diamond as a thermoluminescent dosimeter, 1013
Dielectric losses of self-supporting chemically vapour deposited diamond materials, 1071
Hydrogen termination and electron emission from CVD diamond surfaces: a combined secondary electron emission, photoelectron emission microscopy, photoelectron yield, and field emission study, 1143
Diffusion and thermal stability of hydrogen in homoepitaxial CVD diamond films, 1171
Properties of electron field emitters prepared by selected area deposition of CVD diamond carbon films, 1263
- CVD diamond films
High-temperature performances of diamond-based UV-photodetectors, 982
- CVD-diamond films
Effect of the acidity of aqueous solutions on the wettability of diamond, graphite and pyrocarbon surfaces, 1
- Capacitors
Recent advances in electrochemistry of diamond, 384
- Carbide
Peculiarities of interaction in the Zn-C system under high pressures and temperatures, 129
- Carbide (SiC)
Lift-off technology for SiC UV detectors, 994
- Carbides
BCN thin films near the B₄C composition deposited by radio frequency magnetron sputtering, 502
Preparation of CNSi_x using a RF hollow cathode, 530
Raman and photoluminescence spectra of indented cubic boron nitride and polycrystalline cubic boron nitride, 600
The control of B—N and B—C bonds in BCN films synthesized using pulsed laser deposition, 620
- Carbides and nitrides
Comparative study on the bonding structure of hydrogenated and hydrogen free carbon nitride films with high N content, 577
- Carbon
Molybdenum-containing carbon films deposited using the screen grid technique in an electron cyclotron resonance chemical vapor deposition system, 534
Deposition of nanocomposite CN_x/SiO₂ films in inductively coupled r.f. discharge, 552
Temperature stability of C—N/NbN nanocomposite multilayers, 587
Formation and structure of Ag, Ge and SiC nanoparticles encapsulated in boron nitride and carbon nanocapsules, 911
Effect of carbon nitride bonding structure on electron field emission, 1228
- Carbon conversion efficiency
Carbon transition efficiency and process cost in high-rate, large-area deposition of diamond films by DC arc plasma jet, 1682
- Carbon hybridization
Semi-quantitative description of C hybridization via s- and p-par-

- tial density of states probing: an electron spectroscopy study, 1856
- Carbon nanostructure
Investigation of the growth mechanisms and electron emission properties of carbon nanostructures prepared by hot-filament chemical vapour deposition, 852
- Carbon nanotube
Field emission from carbon nanotubes for displays, 1184
- Carbon nanotubes
Branching carbon nanotubes deposited in HFCVD system, 897
From fullerenes to carbon nanotubes by Ni catalysis, 901
Comparative studies on field emission properties of carbon-based materials, 1249
Characteristics of flat panel display using carbon nanotubes as electron emitters, 1270
- Carbon nitride
Structural and mechanical properties of CN_x thin films prepared by magnetron sputtering, 566
Bonding regimes of nitrogen in amorphous carbon, 643
Nitridation of a diamond film using 300–700 eV N_2^+ ion beams, 698
Effect of carbon nitride bonding structure on electron field emission, 1228
Amorphous carbon and carbon nitride films synthesized by electrolysis of nitrogen-containing liquid, 1307
Thermoanalysis and XRD study of crystallization behaviors of amorphous carbon nitride, 1776
Carbon nitride films on orthopedic substrates, 1984
- Carbon nitride films
Stability of carbon nitride films prepared from volatile CN species via atomic transport reactions, 539
Carbon nitride layers created by laser deposition combined with RF discharge, 548
Deposition of carbon nitride films by filtered cathodic vacuum arc combined with radio frequency ion beam source, 2010
- Carbon nitride thin films
Study of the thermal stability of carbon nitride thin films prepared by reactive magnetron sputtering, 212
X-ray photoelectron spectroscopy characterization of CN_x thin films deposited by electron beam evaporation and nitrogen ion bombardment, 562
- Carbon nitrides
New approach to understanding the reactive magnetron sputtering of hard carbon nitride films, 582
- Carbon onions
Transformation of carbon onions to diamond by low-temperature heat treatment in air, 856
- Carbon phosphide
Studies of phosphorus doped diamond-like carbon films, 1222
- Carbon source
Effect of carbon sources on silicon carbon nitride films growth in an electron cyclotron resonance plasma chemical vapor deposition reactor, 556
- Carbon tubes
Microstructural characterization of diamond films deposited on c-BN crystals, 269
- Carbon-based materials
Comparative studies on field emission properties of carbon-based materials, 1249
- Carburization
Heteroepitaxial diamond nucleation and growth on silicon by microwave plasma-enhanced chemical vapor deposition synthesis, 1840
- Carrier lifetime
Recombination lifetime of charge carriers in DLC thin films, 1357
- Carrier mobility
Phosphorus-doped chemical vapor deposition of diamond, 935
- Catalysis
From fullerenes to carbon nanotubes by Ni catalysis, 901
- Catalytic process
Investigation of the growth mechanisms and electron emission properties of carbon nanostructures prepared by hot-filament chemical vapour deposition, 852
- Cathodic arc
Pin-on-disk characterization of amorphous carbon films prepared by filtered cathodic vacuum arc technique, 819
Low field electron emission from nanoclustered carbon grown by cathodic arc, 1213
- Cathodic arc evaporation
Study on metal-doped diamond-like carbon films synthesized by cathodic arc evaporation, 1756
- Cathodic vacuum arc
A carbon based bottom gate thin film transistor, 805
- Cathodoluminescence
Microelectrical characterisation of diamond films: an attempt to understand the structural influence on electrical transport phenomena, 1061
Surfaces of undoped and boron doped polycrystalline diamond films influenced by negative DC bias voltage, 1636
Growth and characterization of hillock-free high quality homoepitaxial diamond films, 1650
- Cemented carbide
Preparation and performance of diamond coatings on cemented carbide inserts with cobalt boride interlayers, 1738
- Characterization
Optical characterization of amorphous hydrogenated carbon films, 48
Epitaxial Ir layers on $SrTiO_3$ as substrates for diamond nucleation: deposition of the films and modification in the CVD environment, 256
Towards homogeneous and reproducible highly oriented diamond films, 300
Photoluminescence microscopy of TEM irradiated diamond, 397
Characterization of DLC:Si films by the gas effusion technique, 658
Non-equilibrium acoustic phonon propagation in CVD diamond films, 1100
Thermally stimulated properties of CVD diamond films, 1245
Spherical nanometer-sized diamond obtained from detonation, 1722
A near-infrared diamond anti-reflective filter window, 1724
- Charge transfer
Mechanisms of nitrogen aggregation in nickel- and cobalt-containing synthetic diamonds, 883
- Chemical beam epitaxy
Investigation of electromechanical distortions in gallium nitride by reflectance anisotropy spectroscopy, 460

- Chemical bonding
 - Carbon nitride layers created by laser deposition combined with RF discharge, 548
- Chemical vapor deposited diamond
 - Calculation of intrinsic stress by creep deformation of an Si substrate on chemical vapor deposited diamond films, 61
- Chemical vapor deposited films
 - High collection efficiency in chemical vapor deposited diamond particle detectors, 998
- Chemical vapor deposition
 - Kinetic model for diamond nucleation upon chemical vapor deposition, 156
 - Quantitative determination of the adhesive fracture toughness of CVD diamond to WC-Co cemented carbide, 191
 - Transmission electron microscopy study of diamond nucleation and growth on smooth silicon surfaces coated with a thin amorphous carbon film, 274
 - Structural changes in CVD diamond film by boron and nitrogen doping, 337
 - Nitrogen-doped diamond films selected-area deposition by the plasma-enhanced chemical vapor deposition process, 358
 - Double-layer coatings on WC-Co hardmetals containing diamond and titanium carbide/nitride, 494
 - Molybdenum-containing carbon films deposited using the screen grid technique in an electron cyclotron resonance chemical vapor deposition system, 534
 - Hydrogenated amorphous carbon films deposited in an electron cyclotron resonance-chemical vapor deposition discharge reactor using acetylene, 654
 - Sulfur-doped homoepitaxial (001) diamond with n-type semiconductive properties, 941
 - Field emission from nanostructured carbon materials, 1190
 - Construction of a new C-H-O ternary diagram for diamond deposition from the vapor phase, 1320
 - Optical detection of defect centers in CVD diamond, 1349
 - Surface morphology and electrical properties of boron-doped diamond films synthesized by microwave-assisted chemical vapor deposition using trimethylboron on diamond (100) substrate, 1362
 - Multilayer nanocrystalline/microcrystalline diamond films studied by laser reflectance interferometry, 1512
 - Highly efficient electron emitting diode fabricated with single-crystalline diamond, 1561
 - Magnetoresistance effect of p-type diamond films in various doping levels at different temperatures, 1606
 - Growth and characterization of hillock-free high quality homoepitaxial diamond films, 1650
 - A dynamic and thermodynamic model of diamond film growth, 1664
 - A chemical adsorption growth model for hot filament chemical vapor deposition diamond, 1668
 - Deposition of large area high quality diamond wafers with high growth rate by DC arc plasma jet, 1673
 - Effect of substrate temperature on the selective deposition of diamond films, 1687
 - Micro-Raman analysis of the cross-section of a diamond film prepared by hot-filament chemical vapor deposition, 1712
 - Analysis of optical emission spectroscopy in diamond chemical vapor deposition, 1716
 - UV Raman characteristics of nanocrystalline diamond films with different grain size, 1979
- Chemical vapor deposition diamond
 - Pattern metallization on diamond thick film substrate, 1632
- Chemical vapor deposition diamond coating
 - Preparation and performance of diamond coatings on cemented carbide inserts with cobalt boride interlayers, 1738
- Chemical vapour deposited diamond
 - Transient photo-response and residual field measurements in CVD diamond, 408
 - Geometrical non-uniformities in the sensitivity of polycrystalline diamond radiation detectors, 1850
- Chemical vapour deposition
 - Quantifying CVD diamond growth and morphology: a useful technique for studying growth kinetics, 328
 - Ultra-high resolution electron microscopy investigation of growth defects in CVD diamond films: twin interactions and fivefold twin centres, 346
 - Preparation of thick GaN layers by chemical vapour deposition for contact reaction investigations, 464
 - Optical performance of chemically vapour-deposited diamond at infrared wavelengths, 916
 - Photo-induced deep level analysis in undoped CVD diamond films, 1081
 - Optical, thermal and mechanical properties of CVD diamond, 1726
- Chemical vapour deposition diamond
 - Corrosion hard CVD diamond alpha particle detectors for nuclear liquid source monitoring, 1003
 - Electron microscopy of interfaces in chemical vapour deposition diamond films on silicon, 1696
- Chlorination
 - Surface modification of hydrogenated diamond powder by radical reactions in chloroform solutions, 219
- Chlorine
 - Understanding the chemistry of low temperature diamond growth: an investigation into the interaction of chlorine and atomic hydrogen at CVD diamond surfaces, 246
- Cluster
 - Modeling of gas phase nucleation during silicon carbide chemical vapor deposition, 472
- Clusters
 - Mechanism of diamond epitaxial growth on silicon, 1646
- Coating
 - Diamond deposition using a novel microwave applicator, 693
- Cobalt boride interlayer
 - Preparation and performance of diamond coatings on cemented carbide inserts with cobalt boride interlayers, 1738
- Colour enhancement
 - Colour changes produced in natural brown diamonds by high-pressure, high-temperature treatment, 113
- Composition
 - Construction of a new C-H-O ternary diagram for diamond deposition from the vapor phase, 1320
- Compressive stress
 - Study of stress and infra-red absorption line of BN films containing various fractions of cubic phase, 1867
- Computer simulation
 - Calculated electronic density of states and structural properties of tetrahedral amorphous carbon, 736
- Computer simulations
 - Effects of nitrogen impurities on the CVD growth of diamond: step bunching in theory and experiment, 1439

- Condition of deposition
Fracture strength of chemically vapor deposited diamond on the substrate and its relation to the crystalline structure, 1110
- Conductivity
Effect of isotope content on the cubic boron nitride lattice thermal conductivity, 629
- Contact angle
Effect of the acidity of aqueous solutions on the wettability of diamond, graphite and pyrocarbon surfaces, 1
- Contact load
Finite element analysis of the contact stresses in diamond coatings subjected to a uniform normal load, 26
- Corrosion hardness
Corrosion hard CVD diamond alpha particle detectors for nuclear liquid source monitoring, 1003
- Corrosion resistance
Diamond-like carbon coatings applied to hard disks, 815
- Crystal growth
Current status and advances in the growth of SiC, 432
Growth of nitride crystals, BN, AlN and GaN by using a Na flux, 512
The growth rate effect on the nitrogen aggregation in HTHP grown synthetic diamonds, 893
High quality heteroepitaxial diamond films on silicon: recent progresses, 1640
A dynamic and thermodynamic model of diamond film growth, 1664
- Crystalline structure
Fracture strength of chemically vapor deposited diamond on the substrate and its relation to the crystalline structure, 1110
- Crystallization
Thermoanalysis and XRD study of crystallization behaviors of amorphous carbon nitride, 1776
- Crystallization of diamond
Formation process of diamond from supercritical H₂O-CO₂ fluid under high pressure and high temperature conditions, 1945
- Crystallization of graphite
Formation process of diamond from supercritical H₂O-CO₂ fluid under high pressure and high temperature conditions, 1945
- Cubic BN
The equilibrium phase boundary between hexagonal and cubic boron nitride, 7
- Cubic boron nitride
Growth of adhesive c-BN films on a tensile BN buffer layer, 592
Selective etching of boron nitride phases, 614
Effect of isotope content on the cubic boron nitride lattice thermal conductivity, 629

- Comparative study of anneal-induced modifications of amorphous carbon films deposited by dc magnetron sputtering at different argon plasma pressures, 680

Film characterization

- In situ deposition and etching process of a-C:H:N films in a dual electron cyclotron resonance-radio frequency plasma, 573

Film properties

- Comparison of a-C:H films deposited from methane-argon and acetylene-argon mixtures by electron cyclotron resonance-chemical vapor deposition discharges, 37

Films

- Diffusion and thermal stability of hydrogen in homoepitaxial CVD diamond films, 1171
- A near-infrared diamond anti-reflective filter window, 1724
- Pre-treatment for diamond coatings on free-shape WC-Co tools, 1743

Films, DC bias

- Influence of d.c. substrate bias voltage on growth of cubic boron nitride films by radio frequency sputter, 1773

Filtered arc deposition

- Effect of annealing on electron field emission properties of hydrogen-free amorphous carbon films, 1876

Filtered cathodic arc

- Nitrogenated carbon films deposited using filtered cathodic arc, 668
- Filtered cathodic vacuum arc
Deposition of carbon nitride films by filtered cathodic vacuum arc combined with radio frequency ion beam source, 2010
- Filtered cathodic vacuum arc deposition
Tetrahedral amorphous carbon-silicon heterojunction band energy offsets, 1148
- Fine structure
Investigation on the change in structure of tetrahedral amorphous carbon by a large amount of nitrogen incorporation, 544
- Finite element analysis
Finite element analysis of the contact stresses in diamond coatings subjected to a uniform normal load, 26
- First-principle calculation
Roles of nitrogen and boron hydride adsorptions on silicon (001) substrate in boron nitride growth, 596
The different characteristics of boron and nitrogen atoms/ions on silicon(001) substrate and their effect on boron nitride growth, 1768
- Flat panel display
Characteristics of flat panel display using carbon nanotubes as electron emitters, 1270
- Flat panel displays
Emission current influence of gated structure and diamond emitter morphologies in triode-type field emission arrays, 1257
- Formation of diamond
Reaction between carbon and water under diamond-stable high pressure and high temperature conditions, 1480
- Fourier transform infrared absorption
Field emission characteristics of boron carbon nitride films synthesized by plasma-assisted chemical vapor deposition, 1233
- Fowler-Nordheim injection
Field emission controlled by the substrate/CVD diamond interface, 1218
- Fracture toughness
Fracture strength of chemically vapor deposited diamond on the substrate and its relation to the crystalline structure, 1110
Accurate measurement of fracture toughness of free standing diamond films by three-point bending tests with sharp pre-cracked specimens, 1728
- Free standing diamond films
Accurate measurement of fracture toughness of free standing diamond films by three-point bending tests with sharp pre-cracked specimens, 1728
- Free-standing
Preparation of high quality transparent chemical vapor deposition diamond films by a DC arc plasma jet method, 1678
- Friction
Temperature stability of C-N/NbN nanocomposite multilayers, 587
Friction force microscopy study of diamond films modified by a glow discharge treatment, 1421
- Friction coefficient
Pin-on-disk characterization of amorphous carbon films prepared by filtered cathodic vacuum arc technique, 819
- Fullerene films
Nanoindentation of diamond, graphite and fullerene films, 170
- Fullerenes
From fullerenes to carbon nanotubes by Ni catalysis, 901
- GaAs(100)
Investigation of electromechanical distortions in gallium nitride by reflectance anisotropy spectroscopy, 460
- GaN
Low temperature growth of gallium nitride, 456
- Gallium
Indium segregation in MOCVD InGaN layers studied by medium energy ion scattering, 520
- Gallium nitride
Investigation of electromechanical distortions in gallium nitride by reflectance anisotropy spectroscopy, 460
Preparation of thick GaN layers by chemical vapour deposition for contact reaction investigations, 464
- Gas effusion
Characterization of DLC:Si films by the gas effusion technique, 658
- Gas phase
OES study of the plasma during CVD diamond growth using $\text{CCl}_4/\text{H}_2/\text{O}_2$ mixtures, 368
Analysis of optical emission spectroscopy in diamond chemical vapor deposition, 1716
- Gas recycling
Economical deposition of a large area of high quality diamond film by a high power DC arc plasma jet operating in a gas recycling mode, 1655
- Gas- and liquid-phase surface modification
Diamond — an adsorbent of a new type, 2002
- Glow discharge
Chemical stability of nano-diamond films deposited by the dc-glow discharge process, 378
- Gold
Engineering low resistance contacts on p-type hydrogenated diamond surfaces, 975
- Gold layer
Low roughness diamond films produced at temperatures less than 600°C, 1965
- Grain boundary
Electron emission from diamond thin films deposited by microwave plasma-chemical vapor deposition method, 1604
Geometrical non-uniformities in the sensitivity of polycrystalline diamond radiation detectors, 1850
- Grain size
Biased enhanced growth of nanocrystalline diamond films by microwave plasma chemical vapor deposition, 1331
UV Raman characteristics of nanocrystalline diamond films with different grain size, 1979
- Graphite
Effect of the acidity of aqueous solutions on the wettability of diamond, graphite and pyrocarbon surfaces, 1
Effect of hydrogen implantation on the graphite used in high pressure diamond synthesis, 22
Nanoindentation of diamond, graphite and fullerene films, 170

Investigation on the change in structure of tetrahedral amorphous carbon by a large amount of nitrogen incorporation, 544
- Nano-crystalline diamond
High resolution transmission electron microscopy study of the initial growth of diamond on silicon, 1703
- Nano-diamond
Nano-diamond films deposited by direct current glow discharge assisted chemical vapor deposition, 866
- Nano-diamond film
Growth, characterization, optical and X-ray absorption studies of nano-crystalline diamond films, 877
- Nanoarch
Stoichiometric cBN films deposited by electron-cyclotron-wave-resonance plasma sputtering of hBN, 1881
- Nanocrystalline
Multilayer nanocrystalline/microcrystalline diamond films studied by laser reflectance interferometry, 1512
- Nanodiamond
Electron transport and electron field emission of nanodiamond synthesized by explosive detonation, 1600
- Nanodiamonds
Dynamic synthesis of diamonds, 887
- Nanoindentation
Nanoindentation of diamond, graphite and fullerene films, 170
Structural and mechanical properties of CN_x thin films prepared by magnetron sputtering, 566
- Nanostructured CVD diamond
Hypersonic properties of nano- and microstructured CVD diamond, 123

- Nanostructured carbon materials
Field emission from nanostructured carbon materials, 1190
- Nanotubes
Energy distribution of field emitted electrons from carbon nanotubes, 1201
Low field electron emission from nanoclustered carbon grown by cathodic arc, 1213
- Natural diamonds
Colour changes produced in natural brown diamonds by high-pressure, high-temperature treatment, 113
- Negative electron affinity
Field emission controlled by the substrate/CVD diamond interface, 1218
The effect of nitrogen addition on field emission of diamond-like carbon films, 1608
- Negative ions
Electron stimulated desorption of negative hydrogen ions from diamond (100), 1164
- Neutron activation analysis
Determination of metallic impurities in high-purity type IIa diamond grown by high-pressure and high-temperature synthesis using neutron activation analysis, 2019
- Ni substrate
Enhanced nucleation of diamond on polycrystalline Ni by d.c. glow discharge in hot filament CVD, 1475
- Nickel
Mechanisms of nitrogen aggregation in nickel- and cobalt-containing synthetic diamonds, 883
From fullerenes to carbon nanotubes by Ni catalysis, 901
New paramagnetic centers in annealed high-pressure synthetic diamond, 1057
- Nitrates reduction
Effect of boron concentration on the electrochemical reduction of nitrates on polycrystalline diamond electrodes, 1175
- Nitridation
Nitridation of a diamond film using 300–700 eV N_2^+ ion beams, 698
- Nitride
Deposition of carbon nitride films using an electron cyclotron wave resonance plasma source, 524
Growth of adhesive c-BN films on a tensile BN buffer layer, 592
The control of B–N and B–C bonds in BCN films synthesized using pulsed laser deposition, 620
Effect of carbon nitride bonding structure on electron field emission, 1228
- Nitrided chromium
Chemical vapour deposition of diamond on nitrided chromium using an oxyacetylene flame, 341
- Nitrides
The dielectric behaviour of commercial polycrystalline aluminium nitride, 467
Growth of nitride crystals, BN, AlN and GaN by using a Na flux, 512
Epitaxial aluminum nitride thin films grown by pulsed laser deposition in various nitrogen ambients, 516
Deposition of nanocomposite CN_x/SiO_2 films in inductively coupled r.f. discharge, 552
Temperature stability of C–N/NbN nanocomposite multilayers, 587
- Raman and photoluminescence spectra of indented cubic boron nitride and polycrystalline cubic boron nitride, 600
Photoluminescence and infra-red absorption of hydrogenated amorphous CN_x films, 761
Chemical bonding, structure, and hardness of carbon nitride thin films, 1784
- Nitrogen
The effect of nitrogen on competitive growth mechanisms of diamond thin films, 236
Indium segregation in MOCVD InGaN layers studied by medium energy ion scattering, 520
Bonding regimes of nitrogen in amorphous carbon, 643
Dielectric properties of RF plasma-deposited a-C:H and a-C:H:N films, 801
Structure and defects of detonation synthesis nanodiamond, 861
Mechanisms of nitrogen aggregation in nickel- and cobalt-containing synthetic diamonds, 883
The growth rate effect on the nitrogen aggregation in HTHP grown synthetic diamonds, 893
A study of plastic deformation profiles of impressions in diamond, 1115
Super-cell calculation of the nitrogen defect in diamond and cubic silicon carbide, 1471
- Nitrogen aggregation
The nitrogen aggregation sequence and the formation of voidites in diamond, 87
- Nitrogen defects
Small-angle X-ray scattering in type Ia diamonds, 1494
- Nitrogen doping
High-resolution electron energy-loss spectroscopy of undoped and nitrogen-doped tetrahedral amorphous carbon films, 722
Effect of nitrogen doping on the electron field emission properties of chemical vapor deposited diamond films, 1591
- Nitrogen impurities
Effects of nitrogen impurities on the CVD growth of diamond: step bunching in theory and experiment, 1439
- Nitrogen incorporation
Investigation on the change in structure of tetrahedral amorphous carbon by a large amount of nitrogen incorporation, 544
- Nitrogen ion bombardment
X-ray photoelectron spectroscopy characterization of CN_x thin films deposited by electron beam evaporation and nitrogen ion bombardment, 562
- Nitrogen-doped diamond
Measurement of field emission from nitrogen-doped diamond films, 1569
- Nitrogen-doped diamonds
Nitrogen-doped diamond films selected-area deposition by the plasma-enhanced chemical vapor deposition process, 358
- Nitrogenated hydrogenated amorphous carbon
Tailoring of the field emission properties of hydrogenated amorphous carbon thin films by nitrogen incorporation and thermal annealing, 1205
- Non-diamond carbon
Effect of non-diamond carbon content on the spatial distributions of emission sites of the diamond films, 1506
- Non-equilibrium acoustic phonons
Non-equilibrium acoustic phonon propagation in CVD diamond films, 1100

- Non-hydrogenated tetrahedral amorphous carbon
Tetrahedral amorphous carbon-silicon heterojunction band energy offsets, 1148
- Nucleation
Kinetic model for diamond nucleation upon chemical vapor deposition, 156
Chemical stability of nano-diamond films deposited by the dc-glow discharge process, 378
Modeling of gas phase nucleation during silicon carbide chemical vapor deposition, 472
Influence of SiC particle addition on the nucleation density and adhesion strength of MPCVD diamond coatings on Si_3N_4 substrates, 483
High quality heteroepitaxial diamond films on silicon: recent progresses, 1640
Mechanism of diamond epitaxial growth on silicon, 1646
Nucleation and growth of diamond films on aluminum nitride by hot filament chemical vapor deposition, 1660
High resolution transmission electron microscopy study of the initial growth of diamond on silicon, 1703
- Nucleation and growth
Characterization of boron nitride film synthesized by helicon wave plasma-assisted chemical vapor deposition, 67
- Nucleation density
Diamond nucleation and growth under very low-pressure conditions, 1691
- OH radicals
Deposition of diamond from a plasma jet with phenol as the carbon source, 140
- Ohmic contact
Engineering low resistance contacts on p-type hydrogenated diamond surfaces, 975
- Optical band gap
Field emission characteristics of boron carbon nitride films synthesized by plasma-assisted chemical vapor deposition, 1233
- Optical bandgap
Hydrogenated amorphous carbon films deposited in an electron cyclotron resonance-chemical vapor deposition discharge reactor using acetylene, 654
- Optical emission spectra
Optical emission spectroscopic studies of microwave enhanced diamond CVD using CH_4/CO_2 plasmas, 311
- Optical emission spectroscopy
Characterisation of the secondary glow region of a biased microwave plasma by optical emission spectroscopy, 305
Lithium addition during CVD diamond growth: influence on the optical emission of the plasma and properties of the films, 1046
Plasma-assisted chemical vapor deposition process for depositing smooth diamond coatings on titanium alloys at moderate temperature, 1862
- Optical properties
Deposition of carbon nitride films using an electron cyclotron wave resonance plasma source, 524
Nitrogenated carbon films deposited using filtered cathodic arc, 668
High-resolution electron energy-loss spectroscopy of undoped and nitrogen-doped tetrahedral amorphous carbon films, 722
Optical performance of chemically vapour-deposited diamond at infrared wavelengths, 916
Effects of short-range order on the electronic structure and optical properties of amorphous carbon, 1369
- Optical spectroscopy
Colour changes produced in natural brown diamonds by high-pressure, high-temperature treatment, 113
OES study of the plasma during CVD diamond growth using $\text{CCl}_4/\text{H}_2/\text{O}_2$ mixtures, 368
Spectroscopy of defects and transition metals in diamond, 417
- Optical transmittance
Growth, characterization, optical and X-ray absorption studies of nano-crystalline diamond films, 877
- Optics
Optical characterization of amorphous hydrogenated carbon films, 48
